LinkedIn Profile

Technical Skills

Backend
Java, Spring Boot, Spring Batch, Spring Data JPA, Hibernate, REST APIs, Python, Django, FastAPI

Frontend
React.js, JavaScript, HTML, CSS, Tailwind CSS

DevOps
Docker, Kubernetes, Jenkins, GitLab CI/CD, ArgoCD, SonarQube, Terraform, Ansible

Monitoring
Kibana, Elasticsearch, IBM Log Analysis

Databases
PostgreSQL, SQL Lab, H2, MySQL, Flyway

Tools
Jira, ServiceNow, Git, Linux, IBM Cloud

Languages

English: Fluent
French: B1
Tamil: Native

Core Strengths

Production support
Incident investigation
Log analysis
Problem solving
Team collaboration
Code review
Agile and Scrum

Professional Summary

Software Engineer specialising in Java, Spring Boot, Spring Batch and DevOps. Experienced in enterprise banking applications, production deployments, Kubernetes monitoring, incident investigation and CI/CD. Skilled in analysing application logs and production data to identify and resolve technical issues.

Professional Experience

BNP Paribas – BCEF IT– WORKFLOW **12/2024 – Present**
Software Engineer consultant, Paris, France

- Developed enterprise banking applications using Java, Spring Boot and Spring Batch following Clean and Hexagonal Architecture.
- Built secure REST APIs with OpenPGP encryption and integrated IBM Cloud Object Storage (COS) using the Amazon S3 SDK.
- Developed resilient orchestration and batch applications with JUnit, Mockito and SonarQube to ensure reliable, maintainable and high-quality code.
- Deployed applications to Kubernetes using ArgoCD and provided production support by monitoring pods and resolving incidents through Kibana, Elasticsearch, IBM Log Analysis, PostgreSQL and SQL Lab.
- Managed CI/CD pipelines with GitLab CI/CD and Jenkins, while leveraging IBM BOB, DEVX and Mistral AI to accelerate software development.

BNP Paribas – BCEF IT–WORKFLOW **03/2024 – 09/2024**
Software Engineering Intern, Paris, France

- Developed Java Spring Boot and Spring Batch applications for enterprise banking workflows.
- Migrated JDBC queries to Spring Data JPA and Hibernate.
- Created automated tests using TDD, BDD, JUnit and Mockito.
- Worked with PostgreSQL, H2, Flyway, Docker, Kubernetes and IBM Cloud.

Tata Consultancy Services **10/2021 – 07/2022**
Technical Engineer, India

- Developed and tested Java applications using TDD, JUnit and Mockito.
- Improved code quality, maintainability and application reliability.

Education

Master's in Software Engineering and Digital Transformation
09/2022 – 09/2024
ESIGELEC, Saint-Étienne-du-Rouvray, France
◇ Specialisation in Java development, DevOps and cloud computing.

Bachelor of Technology **08/2017 – 08/2021**
Sri Manakula Vinayagar Engineering College, Puducherry, India
◇ Graduated with distinction.

Projects

Java Batch Processing Application
◇ Developed a Spring Batch application using Java and PostgreSQL, containerised with Docker and deployed on Kubernetes.

Identity Data Extraction Application
◇ Developed an AI-based identity data extraction application using React, Python, YOLOv8, OpenCV and TensorFlow.

Library Management Web Application
◇ Built a full-stack application using React, Spring Boot, REST APIs and MySQL.

Research and Publication

IEEE Software Engineering and Artificial Intelligence Conference **03/2023**
◇ Published research related to computer vision, semantic mobile services and data extraction from textual images.

Certifications

IBM Professional Certificate in Applied DevOps
◇ Skills in Git, Jenkins, Docker, Kubernetes, OpenShift, and IBM Cloud.

Data Structures and Backend in Java – Coursera
◇ Proficient in Java programming for backend development.

Frontend Development with React – Coursera
◇ Skilled in HTML, CSS, JavaScript, and React for dynamic UI design.
